Telephones

Wide range of voice terminals with Dual Purpose Station Ports, choice of three colors

Buyer profile

- Small business that needs 5-20 extensions, up to 48 phones
- Looking for the best value for their money
- Wants voice telephony functionality
- Wants a key system: full business features, multiple line appearances; flexible, easy to use

Key Benefits and Applications

User Features — PARTNER has a robust array of built-in features that users need most: hold, forward, transfer, call park/pickup, bridging, screening, camp on, auto dial, etc.

Caller ID — Caller name and number display are standard.

Conferencing — Conferencing for up to 5 parties.

Dual Purpose Station Ports — Easily plug in tip/ring devices (phones, fax machines, answering machines, modems or PARTNER telephones).

Messaging — Choice of 2 messaging systems:

PARTNER Voice Messaging — 2 ports, 4-12 mailboxes, 10-30 minutes of storage per mailbox. Basic features.

PARTNER Messaging — 2,4, or 6 ports, 200 mailboxes, 100 hours of storage. Over 100 features. Manage voicemail and e-mail in one mailbox.

Wireless — Connect up to 18 TransTalk® 9040 digital wireless handsets, providing one-touch access to important features.

Remote Call Forwarding — Calls that come into the PARTNER system can be forwarded to external numbers.

Cell Phone Connect/Outcalling — Ring both your office phone and your cell phone, or other phone, simultaneously when a call comes in. Forward calls to an external number, like a cell phone.

T1 — PARTNER supports fractional T1, up to 16 circuits. Running phone lines over T1 digital lines is more cost-effective than individual lines.

Reliability — PARTNER ACS is a tried and proven solution, relied on by more SMBs than any other solution in its class.

Growth and Investment Protection — PARTNER ACS has a modular design and simple upgrades via PCMCIA cards. Stations, lines and capabilities can be added “as needed.” PARTNER phones can be used on the MERLIN MAGIX™ Integrated System.

PC Administration and Diagnostics — Optional PC administration with Windows®-based PC software.

Backup & Restore — System-wide backup & restore functionality, via standard PCMCIA card, without the need for an additional PC.

Value — PARTNER ACS is truly the best value for your money for the robust package it delivers.
